2018

Educational Content Management System

 Funtoot (Merged into Embibe)  Bengaluru

- I was responsible for maintenance and feature requests for NodeJS server which helped the content reviewer team to review and publish the questions from our organization database to another organization database as part of a service agreement.
- Have developed many angular apps, angular directives for our product's CMS platform.
- Integrated google translate API as an immediate translation solution to the content team before they review and modify appropriately.
- To increase the UI development process written grunt configuration to compile SASS to CSS and to hot reload the page for plugin development.
- Designed schema for new collections in MongoDB.

2021

Online learning platform

 Embibe (Reliance Industries)  Bangalore

- I was one of the 3 core members of the team which kickstarted the whole rebranding and redesigning the educational portal from scratch.
- Added react tv navigation support to all the UI components
- I have added storybook (UI component explorer) to the codebase and added the core components to it.
- I have owned the development of new complex mathematical question types which needed to be mirrored from funtoot in ReactJS.
- Ensured the question types are compatible with mobile, tablet, web.

2017
|
2018

A Table Library (like react-table) in AngularJS

 Funtoot  Bengaluru

- After the content team needed a bit advanced content filtering tool we decided to create a table library in AngularJS
- I have owned the complete module development and integration into the CMS portal
- The library had rich features such as sorting, column search, table search, custom filter, pagination, selecting rows, row action, table actions, custom coloring for selected rows, and specific columns
- <https://shivashanmugam.github.io/table-almighty/>

2017
|
2018

Test Creation Module

 Funtoot  Bengaluru

- Created a tree-based check-box enabled syllabus selection module
- Integrated a new drag and drop UI module for a table library to order the question sequence in the test
- Integrated MathJax enabled WYSIWYG editor into the test module to add test instruction for the test
- Dynamically generating questions from the selected syllabus and showed it as suggested questions
- The module was feature-rich enough later the team decided to make it a separate cross-selling product to schools

2018

2019

Worksheet creation module

 Funtoot  Bengaluru

- There was content editor platform of sunbird-content-editor which is the backbone of the government-owned Diksha app(<https://diksha.gov.in/>) I was part of the team which was responsible for the worksheet creation module
- Was responsible for creating MultipleChoiceQuestion, MatchTheFollowing, FillInBlanks, and Sequencing question types editor and render inside the content creation plugin

2017
|
2018

● Educational plugins with translation support

📁 Funtoot 📍 Bengaluru

- After understanding a unique plugin package bundling system of sunbird-content-editor (A open source editor which is behind diksha.gov.in and Infosys wingspan), written an automation script to convert English plugins to Telugu and Marathi
- Converted i18n JSON strings to CSV for the content team to come back with the translated text
- Then imported the CSV i18n strings from the spreadsheet and created English plugins
- Written a translation error finding mechanism that ensured non-translatable math expressions are present before creating plugins

2016
|
2017

● Lead Management Software System

📁 Indo Sakura 📍 Bengaluru

- Owner of a user interface development of Lead management software from scratch and was the sole owner of all the front end modules
- Responsible for coordinating with the design and backend team for the UI requirements
- Directed the testing team on helping in creating test-cases and created an automation script to which will verify all the cases
- Added internationalization support with Japanese and English language

2015
|
2016

● Offsite organization portal

📁 Higher One 📍 Chennai

- Designed and created an offsite portfolio portal for the organization.
- Implemented mobile responsiveness to the portal
- Tested the portal with multiple test cases and successfully delivered
